GATES

At Calders & Grandidge all our pressure treated gates, are manufactured to the highest standard using premium quality, slow grown timber which is machined and pressure treated prior to assembly to ensure the maximum possible service life.

For those that prefer a natural durable, untreated timber product we can also manufacture our full range of gates using top quality hardwood.

Our range of field gates all include an enhanced 32mm bottom rail, giving more rigidity, eased edges for quality appearance and a smooth planed surface.

All our gates are assembled and finished by our skilled craftsmen here at Boston and can be delivered direct to your door or storage facility.

As holders of the Royal Warrant for the supply of preserved timber fencing to Her Majesty The Queen, we take great pride in the products we produce. The gates we supply Her Majesty can be found at The Royal Stud and Sandringham and all our fencing and gates are produced to these same high standards.
